

AmCham Trade Mission
Oil & Gas Conference & Exhibition
ONS 2010
energy for more people
24 – 27 August 2010
Stavanger, Norway

Building on the success and experience gained in organising 11 trade missions to the Offshore Technology Conference Houston, AmCham is organising a fully escorted all inclusive Trade Mission to Stavanger, Norway (ONS). Delegates will have unequalled networking opportunities.

Exhibition

ONS is one of the world's leading energy industry expositions. This expo provides you with direct access to an offshore sector where investment worldwide is set to reach record levels over the next few years.

Conference

The ONS Conference has gained a reputation as one of the world's most important international oil, gas and energy fora. ONS offers top speakers and a programme which sets the standard for the industry.

Festival

ONS is the only energy expo in the world offering visitors a high-quality cultural event. Visit ONS website at www.ons.no.

Meetings and Presentations

Delegates on the AmCham Trade Mission to ONS have access to exclusive opportunities as indicated:

STATOIL: Our Delegates have been invited to a site visit and presentation at Statoil's headquarters in Stavanger. Statoil is the world's largest deepwater operator and a leading player in sub-sea development. Statoil has more than 29,500 employees in 40 countries. Main operations on the Norwegian Continental Shelf (NCS) with an increasing focus on new international acreage.

TAMPNET AS: Our Delegation has also been offered assistance by TAMPNET AS in Stavanger, in regards to introductions to major companies based in Stavanger: Tampnet operates the largest offshore high capacity communication network in the world, serving 34 fields and carrying traffic for approximately 50 platforms.

INTSOK: AmCham Delegates have been invited by INTSOK (Norwegian Oil and Gas Partners) to participate in some international customers events during ONS. INTSOK's objective is to work with companies throughout the industry to expand the business activities in the international oil and gas markets on the basis of the industry's leading edge experience, technology and expertise.
